

Description

The Blackline PRO is based on OBL's proven mechanical diaphragm and plunger pump technology with the addition of a variable speed drive controller.

The unit comes with ten different operating modes, fully configurable, allowing you to fit the pump in any advanced pumping solution where the unit needs to be controlled remotely and automatically.

The Blackline PRO comes in a variety of flows and pressures as well as wet-end materials allowing you to find the best pumping solution for any application.

A full aluminium gearbox and control unit housing with antiacid EPD coating result in one of the most rugged and purposeful metering pumps on the market.

Form follows function: the angled backlit display and single jog dial element, make this an extremely versatile and simple to use metering pump.
